

What are the most important issues to consider to enable us meet the field operators' requirements for operations outside the GOM?

Understand :

- Client performance expectations
- Possible constraints or limitations
- Regulatory requirements, i.e.:
 - Department of Trade
 - Health, Safety & Environmental
 - Flag state legislation
- Local customs and practices

Create:

- Contract format with balanced risk and reward “win-win” situation
- Incentives for superior performance /secure revenue for “normal” performance
- Clearly defined roles and interfaces between operator and contractor

Operate efficiently:

- Implement systems of work on priority issues, i.e.:
 - HSE performance
 - planning / scheduling
 - technical integrity
- Prioritize and plan
- Measure performance
- Continuously review and make improvements
- Utilize “best practices” from other Bluewater operations

Have a competent & motivated workforce:

- Create a safe working environment
- Through training & assessment programs
- Provide career opportunities
- Share knowledge through job rotation schemes
